

KIRIL PETROVSKI

Madrid, Spain | kpetrovski.ieu2024@student.ie.edu | (+34) 627 651 684
LinkedIn | GitHub | kpetrovski.me | Eligible to sign an internship agreement via IE University

EDUCATION

IE University

Bachelor in Computer Science & Artificial Intelligence

Madrid, Spain

Expected: May 2028

- GPA 8.06/10.00; Machine Learning final project scored 100/100.
- **SEK International School**, Doha, Qatar (2018–2024): predicted IB Diploma 38/45 (HL Mathematics & Physics).

EXPERIENCE

naiss ride

Mobile Software Engineer (part-time)

Remote

June 2026 – Present

- Ship features to a live social-carpooling app (iOS & Android, rated 4.6/5 on the App Store) across camera, feed, gamification, rewards, auth, and payments in React Native, Expo, TypeScript, and Convex.
- Lead initiatives end-to-end — a flexible rewards & ranking engine and a full camera-capture revamp — shipping 40+ tickets into a near-weekly release cadence via EAS over-the-air updates.

EaseAccess24

Software Engineering Intern – AI Automation & Developer Productivity

Skopje, North Macedonia

June 2026 – Present

- Built the company's internal intelligence system: a self-hosted Slack + Gemini service (Docker, BullMQ, PostgreSQL, Redis) that turns meeting recordings into structured summaries and validated Jira sprint digests, surfaced in a Next.js dashboard.
- Shipped a Shopify app (Remix, Prisma, App Bridge) that brings the accessibility widget to any storefront, and an internal CLI that replaced manual `.env` sharing over Slack for a 12-person team.

Cleanr

Tech Lead & Full-Stack Developer

Madrid, Spain

March 2025 – April 2026

- Led a 3-developer team building a dual-sided, Uber-like apartment-cleaning marketplace (React Native, Expo, TypeScript, Firebase, Stripe, Google Maps) across iOS and Android; platform served 600+ cleanings.
- Architected real-time booking, cleaner matching, and payment flows; product named Best Undergraduate Startup at IE Venture Lab 2025.

IE Tech Lab – Bloomberg Project

Tech Lab Student Collaborator

Madrid, Spain

January 2026 – June 2026

- Co-built a Bloomberg-sponsored ESG Trust Score product and a simplified Bloomberg Terminal prototype for next-generation retail investors, shipping a working prototype in 3 weeks while collaborating directly with Bloomberg contacts through IE's Tech Lab.

PROJECTS

Chess Anomaly Detection – Machine Learning – scored 100/100 | GitHub

2026

- Detected online-chess cheating with a Local Outlier Factor model at 0.971 test AUC, flagging 312 of 17,909 players through an end-to-end ensemble pipeline.

Battleship Multiplayer – Systems & Network Programming in C | GitHub

2025

- Built a LAN multiplayer Battleship in C with an authoritative client–server design over POSIX sockets: a custom binary protocol, one pthread per client, and mutex-synchronized state for 2-player matches.

StreamScope – Real-Time Chat Intelligence – 2nd Place, IE Tech Venture Bootcamp 2026

2026

- Shipped a real-time chat-intelligence MVP for live streamers from zero to deployed in 10 days, placing 2nd of all teams; led architecture and full-stack delivery.

LANGUAGES & TECHNOLOGIES

- **Languages:** Python, TypeScript, JavaScript, C, C++, Java, SQL. **Frameworks:** React Native, Expo, React.js, Next.js, Node.js.
- **Cloud & Data:** Firebase, AWS (Lambda, DynamoDB, API Gateway, Step Functions), Convex, PostgreSQL, Redis, Docker, Git/GitHub, CI/CD.
- **AI & ML:** LLM integration (Gemini), machine learning, prompt engineering, REST API design. **Testing:** Jest, Detox, Sentry, PostHog.
- **Certifications:** Anthropic — AI Fluency, Building with the Claude API, Claude Code in Action, Model Context Protocol (2026); AWS Educate — Compute (2025).
- **Spoken languages:** Macedonian and English (native); Spanish (intermediate).
