

KIRIL PETROVSKI

Madrid, Spain

(+34) 627 651 684 | kpetrovski.ieu2024@student.ie.edu | LinkedIn | GitHub | kpetrovski.me

Eligible to sign an internship agreement via IE University

SUMMARY

Analytical and execution-driven Computer Science & AI student with a strong background in full-stack and mobile development, cloud-native architecture, and AI automation. Adept in cross-functional collaboration, technical leadership, and shipping production-grade software across startups and internship environments. Passionate about building AI-powered products that create measurable business impact. Available for internships from Summer 2027.

EDUCATION

IE UNIVERSITY

Bachelor in Computer Science & Artificial Intelligence

Madrid, Spain

Expected: May 2028

- GPA: 8.06/10.00
- Relevant subjects: Algorithms & Data Structures, Object-Oriented Programming, Machine Learning, Calculus, Linear Algebra, Introduction to AI
- Machine Learning final project: Chess cheating detection engine – scored 100/100
- IB Predicted Score: 38/45 (Higher Level Mathematics and Physics)

EXPERIENCE

Naiss Ride Company

Mobile Software Engineer

Madrid, Spain

June 2026 – Present

- Engineering production features across trips, journeys, feed, camera/capture, gamification, notifications, onboarding, auth, and payments flows in a live React Native / Expo app using TypeScript and Expo Router.
- Improving product reliability and mobile performance using Sentry for error monitoring and PostHog for product analytics, contributing to a stable release cadence within a cross-functional mobile engineering team.
- Contributing to test coverage and quality assurance using Jest (unit) and Detox (E2E), and managing builds and OTA updates via EAS.

EaseAccess24

Software Engineering Intern – Developer Productivity & AI Automation

Remote

June 2026 – Present

- Built an internal CLI tool to automate `.env` file switching and synchronisation across staging, production, and other environments, replacing a slow and error-prone manual workflow used by the development team.
- Implemented commands including `ea24 env pull` and `ea24 env check` with Vercel and Psono integrations, reducing environment-related friction and context-switching overhead for the engineering team.

Cleanr

Tech Lead & Full-Stack Developer

Madrid, Spain

March 2025 – April 2026

- Led a team of 3 developers building an Uber-like apartment-cleaning marketplace mobile app using React Native, Expo, TypeScript, Firebase (Firestore, Auth, Cloud Functions, Cloud Storage), Stripe, and Google Maps.
- Architected real-time booking, cleaner matching, scheduled and on-demand booking flows, and cancellation and penalty logic, enabling a fully automated end-to-end service marketplace experience.
- Drove architectural decisions and sprint planning, mentoring junior developers and maintaining a stable production release cadence across iOS and Android.

Kanamoh Solutions

Front-End Developer

Madrid, Spain

April 2025 – June 2025

- Developed a responsive React.js front-end for an LLM-powered generative AI 3D printing platform, enabling non-technical users to produce sliceable CAD models from natural language prompts.
- Part of the winning team in the OpenAI x IE | ChatGPT Use Case Playbook Competition, hosted by IE Big Data & AI Club and IE Robotics & AI Club, validating the product concept at a competitive university level.

IEU LABs – Technology Lab

Research & Innovation Associate

Madrid, Spain

January 2025 – June 2025

- Conducted applied R&D on machine learning and digital transformation in collaboration with faculty and industry partners, producing findings presented to institutional stakeholders.
- Contributed to cross-functional project teams bridging academic research and real-world deployment, strengthening structured problem-solving and technical communication skills.

IE Robotics & AI Club

Developer

Madrid, Spain

January 2025 – May 2025

- Engineered autonomous systems prototypes alongside peers using AI/ML frameworks, translating theoretical

concepts into functional demonstrations for club showcases and knowledge-sharing sessions.

MACEF – Macedonian Center for Energy Efficiency
Renewable Energy Intern

North Macedonia
July 2022 – August 2022

- Analyzed photovoltaic system performance data and modeled panel orientation scenarios to identify optimization strategies, contributing to energy output improvement recommendations.

Accent On Computers LLC
IT Intern – Software & Hardware

North Macedonia
June 2022 – August 2022

- Performed software deployment, system configuration, and fault diagnosis for SMB clients, resolving technical issues and reducing client downtime.
- Assisted a hardware engineer with PC diagnostics and component replacement, gaining hands-on exposure to full IT support workflows in a commercial environment.

Texas A&M University at Qatar – ECE Department
Student Technical Assistant

Doha, Qatar
October 2021 – April 2022

- Developed Python applications for algorithmic problem-solving and game logic within the ECE department, strengthening foundational programming and computational thinking skills.
- Improved client engagement protocols through structured communication, contributing to a measurable 10% increase in departmental sales conversions.

TECHNICAL PROJECTS

StreamScope – Real-Time Chat Intelligence – Startup Venture 2026

- Built a real-time chat intelligence product for live streamers from zero to deployed MVP in 10 days at the IE School of Science & Technology Tech Venture Bootcamp 2026, placing 2nd out of all competing teams.
- Led technical architecture and rapid full-stack delivery under tight deadline constraints, applying agile prototyping, stakeholder pitching, and iterative product development skills.

Aura AI Secretary – Conversational AI / VoIP Automation 2025

- Architected an AI-powered virtual receptionist using LLM-driven dialogue management and VoIP integration to automate inbound call routing, appointment scheduling, and intelligent agent handoff for SMB clients.
- Supported commercial go-to-market execution, helping secure two enterprise clients (a medical office in Luxembourg and a restaurant chain) through real-world deployment and iterative client feedback cycles.

NomNomNow – Serverless Cloud Architecture – AWS 2024

- Designed a fully serverless food delivery backend using AWS Lambda, API Gateway, DynamoDB (single-table design), Cognito, and Step Functions to deliver scalable, cost-optimised order workflow orchestration.
- Implemented Infrastructure as Code via CloudFormation and WebSocket-based real-time order tracking, deepening expertise in cloud-native architecture patterns and production observability with CloudWatch.

Battleship Multiplayer – Systems Programming – C / POSIX Sockets 2024

- Built a networked multiplayer game in pure C using POSIX sockets and pthreads, implementing a custom binary protocol and mutex-synchronized game state to support stable concurrent client sessions over LAN.
- Designed a finite state machine architecture for game flow management, deepening low-level systems programming skills including memory management, serialisation, and multi-threaded debugging.

Polygon Protocol – Game Jam – Godot Engine / GDScript | itch.io | GitHub 2024

- Developed a solo geometric roguelite bullet-hell game in Godot Engine for Mini Jam 202: Power-up, ranking **#7 in Enjoyment** and #11 Overall out of 160 submissions.
- Implemented procedural enemy wave generation, shader-based visual effects, object pooling, and state machine AI to achieve stable 60FPS performance throughout.

Starburst – Web Game Development – HTML5 Canvas / JavaScript 2023

- Engineered a browser-based bullet-hell shooter in vanilla JavaScript and HTML5 Canvas, achieving smooth 60FPS through spatial hashing for O(1) collision detection and RequestAnimationFrame delta-time interpolation.
- Applied object pooling and sprite batching to eliminate garbage collection pauses, gaining deep practical understanding of browser rendering pipelines and JavaScript performance optimisation.

ADDITIONAL EXPERIENCES

- **Boston University – Summer Program** (Boston, MA. June – July 2023): Completed university-level coursework in Computer Science (Python) and Communication; developed structured analytical and technical writing skills.
- **FIFA World Cup Qatar 2022 – Volunteer Flag Bearer**: Selected for official match ceremonies in a high-profile international event; demonstrated professionalism and cross-cultural teamwork (Doha, Qatar. November – December 2022).

- **Community Infrastructure Project Lead – SEK International School:** Led a cross-functional student team to deliver a community renovation project on time (Doha, Qatar. November 2022 – February 2023).
- **Olkoroi Wilderness Camp – Sustainability Volunteer:** Contributed to community development and sustainability initiatives alongside international teams (Maasai Mara, Kenya. March 2023).
- **Qatar Hackathon 2021 – Participant:** Competed in a technology sprint applying rapid prototyping, agile thinking, and full-stack development skills (Doha, Qatar. 2021).

SKILLS & CERTIFICATIONS

- **Languages & Frameworks:** Python, JavaScript, TypeScript, C, SQL; React Native, React.js, Next.js, Astro, Node.js.
- **Mobile & State Management:** Expo, Expo Router, EAS, Zustand, NativeWind, GluestackUI, Convex.
- **Cloud & DevOps:** Firebase (Firestore, Auth, Cloud Functions, Storage), Supabase, AWS (Lambda, DynamoDB, API Gateway, Cognito, Step Functions, CloudFormation), Google Cloud Platform, Microsoft Azure, Docker, Git/GitHub, CI/CD pipelines.
- **Testing & Observability:** Jest, Detox, Sentry, PostHog.
- **AI & Data:** Machine learning, LLM integration, NLP workflows, REST API design, prompt engineering, conversational AI.
- **Game Development:** Godot Engine, GDScript, Unity, procedural generation, shader programming, state machine AI, performance optimisation.
- **Design & Creative Tools:** Adobe Premiere Pro, Photoshop, Blender, Audacity, Aseprite, Onshape.
- **Certifications:** AWS Educate – Getting Started with Compute (2024); UDEMY Complete Python Bootcamp (2024); STEM Academy (2021).
- **Languages:** Macedonian (Native). English (Native/Bilingual). Spanish (Intermediate, daily use since 2024). German (Beginner).
- **Interests:** Competitive basketball (5+ years); Half-Marathon & 10km racing; Cello (6 years, live performances); game development.
